

Born in 1994, SAGIPER emerged into the European market and revolutionized the construction and renovation industry by introducing its high quality PVC product lines. Since then SAGIPER has continued its relentless pursuit in maintaining and developing its products to provide aesthetically pleasing, maintenance free, and modern finishing solutions for all of its end users around the world. Our product lines are designed specifically for your contemporary residential and commercial projects offering the natural look of wood, metallic, aluminum and RAL finishes.

SOLAR SHIELD TECHNOLOGY

Infrared radiation from the sun is simply reflected by SST to provide protection against excessive heat build-up resulting in cooler profiles. With SST, profiles retain their dimensional stability so that panels and trims remain secure. SST acts as a protective shield. Its reflective property safeguards the film itself, the adhesive and the profile. SST provides protection for SAGIPER's exterior film, with dark colours and wood décors enjoying the most significant benefits. SST slows down the ageing process and prolongs the life of the PVC core and construction components.

SAGIPER is very proud to present its green initiative in PVC and vinyl material recycling. All PVC cutting debris, spare cuts and production line excess, is collected, melted down and formed into reusable gardening stakes, or as we like to call them, SAGISTAKES. This ensures that no PVC, or vinyl wrap in our factory ever goes to waste or thrown out.

BENEFITS:

- Impervious to water
- Impenetrable to insects
- Maintenance-free
- UV Protected
- 50 year warranty (15-year non-prorated)
- Impact and Scratch resistant
- Class A - Fire Rating
- R-value of 2.41 (SAGIWALL)

TESTING / CERTIFICATIONS:

- CCMC 14043-R
- CAN/ULC S134
- ASTM D635-14
- ASTM D696
- ASTM D1435
- ASTM E330/E330M-14 Procedure B
- CAN/ULC S102
- NFPA 285
- CAN/CGSB-41.24-95
- ASTM C1363-11

FILM STRUCTURE

SAGIPER's highly durable exterior vinyl is a multi-layer film with an overall thickness of 170 – 180 µm. The top layer consists of a polyvinylidene fluoride film (PUDF) and absorbs more than 95 % of the UV-radiation, the second is transparent polymethylmethacrylate (PMMA) and the base layer is a solid colour PMMA. The base layer contains Solar Shield Technology (SST) that reflects Infrared (IR) radiation, to further decrease heat build-up of the film and the laminated components.

SAGIWALL™
EXTERIOR SIDING

- 01. SAGIWALL™ CHANNEL 6" PROFILE
- 02. SAGIWALL™ U-GROOVE 6" PROFILE
- 03. ALUMINUM L TRIM 6" X 1.5"
- 04. ALUMINUM L TRIM 3.5" X 1.5"
- 05. ALUMINUM L TRIM 2" X 1.5"
- 06. ALUMINUM J-MOLD 1.5"
- 07. ALUMINUM TERMINATING END CAP
- 08. ALUMINUM H-MOLD 2.5"
- 09. ALUMINUM OUTSIDE CORNER 1.5" X 1.5"
- 10. ALUMINUM STARTER STRIP

SAGIREV™
SOFFIT / INTERIOR CEILINGS / INTERIOR WALLS

- 01. SAGIREV™ 8" FLAT PROFILE
- 02. SAGIREV™ 6" U-GROOVE PROFILE*
- 03. SAGIREV 4" U-GROOVE PROFILE
- 04. CLIP BASEBOARD (2-PIECE)
- 05. J-MOLD
- 06. H-MOLD
- 07. OUTSIDE CORNER
- 08. CLIP CROWN MOLDING (2-PIECE)
- 09. SOFFIT VENT STRIP

NOTE: 6* Profile Stocked in North America

Exterior Finishes

Metallic Exterior Finishes

Note: *Finishes stocked in North America. All other finishes special order. Note: RAL finishes available upon request.
