GFRC CONCRETE PANEL

INTRODUCING SAGICRETE™

SAGICRETE is our innovative Glass Fiber Reinforced Concrete (GFRC) panel solution, designed to deliver the look of traditional "cast-in-place" concrete without the complexity. Engineered for simplicity and cost-effectiveness, SAGICRETE panels require no complicated fasteners, clipping systems, or specialty tools—saving time and reducing overall project costs.

Perfect for both interior and exterior applications, these durable, low-maintenance panels are ideal for commercial projects. SAGICRETE panels look and feel like real concrete because they are real concrete—redefined for modern construction needs.

5 UNIQUE PROFILES FOR ANY PROJECT

Easy to install with no special tools, made from 40% recycled GFRG, and suitable for both interior and exterior applications.

BOARD FORM:

Combining the rustic grain and texture of natural wood, the concrete surface delivers a realistic wood grain finish.

CLASSIC:

Delivers a clean, modern, smooth look to any surface.

MOUNTAINEER:

Features a distinctively concrete surface with the porosity of naturally aged concrete.

CABLE:

This industrial finish features imitation cone ties that mimic holes left by traditional cast-in-place concrete forms.

CUSTOM:

Customized veneers can be tailored to many sizes, shapes, textures, and colors to meet your specifications.

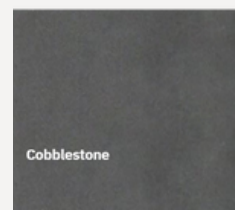

SAGICRETE IS AVAILABLE IN 3 SIZES AND 3 DIFFERENT COLORS:

Urban Grey

Gun Metal

Cobblestone
